Seattle, WA 98101

Re: Colbert Landfill Fact Sheet

Dear Neil,

(b) (6) has asked me to send you the information we would like to have in the upcoming Fact Sheet. Please feel free to edit the article and use whatever format is appropriate.

COLBERT LANDFILL CITIZENS' COMMITTEE MEETING:

Date: July 10, 1991 Time: 7:00 PM
Place: Home of (b) (6)
(b) (6), Colbert, WA 99005
Agenda: Current topics including Sampling Program, Grant
Applications, Clean Sites Report, Status of Phase II

If you plan to attend, please call (b) (6) at (b) (6) or (b) (6) at (b) (6).

CLEAN SITES FORUM

(b) (6) represented the Colbert Community at the Clean Sites' Superfund Community-Industry Forum-West in Los Angeles on March 7, 1991. Four regional forums have been held throughout the United States "designed to foster better communication between the two constituencies with the largest stake in hazardous waste site cleanup--citizens in communities affected by sites and companies working to clean up those sites." (b) (6) felt the issues discussed were relevant to all Superfund Sites and most of the concerns addressed appear to be common throughout the Country. (b) (6) will be glad to answer any questions you might have at the CLCAC meeting on July 10, 1991.

With regard to our discussion of registered water systems and their scheduled sampling frequencies, I hope to discuss this at our next Sampling Committee meeting in June. My notes indicate that I recommended a more frequent sampling of "Water purveyors within the area of either plume regardless of well depth." The owner of the North Meadows system has advised me that they are now serving many more homes than they did a few years ago and I feel that, based on the location of this system, we should take a closer look at this part of our Sampling Criteria.

If you have any questions, please feel free to call.

Sincerely,

(b) (6)

Colbert, WA 99005 (b) (6)
